

Fidel Villegas Hernández

Fullstack Developer · Web, Mobile & AI

Morelia, Michoacán, México | +52 434 106 22 72 | villegas.h.fidel01@gmail.com | linkedin.com/in/fidelvillegashernandez

PROFESSIONAL PROFILE

Fullstack Developer with 2+ years of experience in web and mobile development, including 1+ year of formal employment. Specialized in React, Angular, Laravel, Python, and Next.js, with experience in conversational AI integration using OpenAI API, Gemini Flash, and Blip. Participated in 11+ production deployments on Azure, Hostinger, and GoDaddy environments, Docker container management, API documentation with Swagger, Postman and Yaak, and UI/UX design with Figma. Speaker at Mexico's National Health Strategic Agenda Forum (TecNM). English B2.

RECOGNITION & ACHIEVEMENTS

Speaker — National Health Strategic Agenda Forum, TecNM

April 2025

Talk: "Application of artificial intelligence models for insulin bolus calculation in type 1 diabetes patients"

Mexico City — National event organized by TecNM's Planning, Evaluation and Institutional Development Secretariat.

WORK EXPERIENCE

Fullstack Developer

Jun. 2025 – Jun. 2026

Cantera Digital · Morelia, MX · Remote · Full-time

- Built fullstack web applications using Angular and React on the frontend, Laravel and Python/Flask on the backend, integrated with Supabase and REST APIs documented with Swagger, Postman, and Yaak.
- Integrated conversational AI agents using OpenAI API (chat + realtime voice), Gemini Flash, and Blip for assistance, recommendations, and workflow automation.
- Deployed applications on Azure and Hostinger, managing Docker containers, virtual environments, and environment variable configuration.
- Participated in 11+ production deployments, covering system updates, dependency management, and SSL certificate monitoring.
- Participated in the full data lifecycle for AI-powered dashboards and insights: direct SQL queries, team data cleaning and transformation, MVC endpoint development, and visualization in Power BI, Python, and React/Angular dashboards.
- Configured and implemented push notifications via Firebase Cloud Messaging and Firebase Auth authentication.
- Used Azure DevOps for project management and task tracking, with version control in GitLab (internal projects) and GitHub.
- Collaborated in agile teams with time tracking and iterative module delivery.

Fullstack Developer (Hourly Contract)

Jun. 2026 – Present

Cantera Digital · Morelia, MX · Remote · Hourly contract

- Continued collaboration with the team under an hourly contract, providing support, new feature development, and production system maintenance.

Fullstack Developer (Intern)

May. 2025 – Jan. 2026

DArtesano · Santa Clara del Cobre, MX · Remote

- Designed and built from scratch an internal packaging and supplies control system using Laravel (backend) and React (frontend) via REST API.
- Implemented inventory management modules, supply registration, and operational reports to optimize internal processes.
- Configured development environments with environment variables and version control in GitHub.

Freelance Developer

Jan. 2025 – Present

Independent Projects · Remoto / Remote

- **CSB – Biomedical Consulting & Services:** Web platform with integrated store, admin panel with full CRUD and dynamic content management. Stack: React, Tailwind CSS, Supabase. Deployed on Hostinger.
- **Accounting Consultancy:** Professional landing page in React with responsive design. Deployed on Hostinger.
- **DentalAdvanced (active maintenance):** GoDaddy administration, SSL monitoring, and production content updates (WordPress/PHP).

FEATURED PROJECTS

Techani — Type 1 Diabetes Monitoring System

Jan. 2023 – Dec. 2024

- Winning project · Instituto Tecnológico de Morelia
- **Web:** React, Tailwind CSS, and Supabase — profile management, insulin logging, glucose range settings, and trend visualization.
- **Mobile (Flutter + Supabase):** daily glucose, emotions, exercise, and nutrition tracking with push notifications via Firebase Cloud Messaging.
- Secure authentication with Firebase Auth and Supabase; advanced medical data validation. UI/UX design in Figma; CI/CD flows and collaborative strategies in GitHub.

CERTIFICATIONS

React JS, TypeScript and Next.js

2025 — Blip / Take

EDUCATION

Computer Systems Engineering

2020 – 2024

Instituto Tecnológico de Morelia · Major: Software Development

TECHNOLOGIES & TOOLS

Frontend: React.js, Angular, Next.js, Flutter, React Native, Tailwind CSS, Bootstrap, HTML5, CSS3

Backend: Laravel (PHP), Python (Flask, Django), Node.js, Express

AI & Conversational: OpenAI API (chat + voz realtime), Gemini Flash, Blip, n8n, Conversational Agents

Databases: MySQL, PostgreSQL, Supabase, Firebase (Auth + FCM), MongoDB

Cloud & Deployment: Azure, Azure DevOps, Hostinger, GoDaddy, Vercel, CI/CD, Docker, 11+ production deployments

Infrastructure: Docker, containers, virtual environments (venv), SSL/TLS, .env configuration

Data & Visualization: Power BI, Python (pandas, matplotlib), SQL, React and Angular dashboards

Documentation & APIs: Swagger, Postman, Yaak

Design: Figma (UI/UX)

Version Control: Git, GitHub, GitLab

Languages (Programming): JavaScript/TypeScript, PHP, Python, Dart, Java, C#

Languages: Spanish (native) · English B2 (conversational)
